

Prototype:

1) What is your topic?

12.81 sec

Chris Putter (Sportscaster): Here at the 10th hole we have, the Wright Brothers, the inventors of the airplane who lived through the industrial revolution. Wilbur, do you have anything to tell us about this hole?

11.55 sec

Wilbur: Thanks Chris Putter. The Industrial Revolution was a time when hand and animal powered tools converted to machines. We can thank the Industrial Revolution for motivating us to strive for technological progress. It created many new and amazing inventions.

2) What are your obstacles and what do they symbolize? (Pick 3)

8.18 sec

Chris Putter (Sportscaster): Let's fly over the 10th hole and take a look. It seems to me that there were a few obstacles in the Industrial Revolution. Mind telling us a bit more about that?

12.35sec

Orville: Europe made transportation and trade easier using locomotives. America also tried to use them, but their railroads were light and uneven which prevented them from advancing. Which is why we use tunnels to represent Europe's success and America's dead end with locomotives.

2.89 sec

Chris Putter: Can you tell me a bit more about other obstacles in the course?

11.33 sec

Wilbur: Airplanes were not easy to create, their major problems were pitch, roll and yaw. To represent one of these problems we use a see-saw to replicate pitch of an airplane. Pitch is the up and down movement of the plane's nose.

11.53 sec

Also another obstacle in hole #10 is the radio. You see the up side of the hill represents the slow movement of news before the radio and the down side represents after the radio was built and the increased spread of information.

3) Explain the math involved with your course/obstacle.

5.21 sec

Chris Putter (Sportscaster): So let me in on a little secret, how would I be able to make a hole in 1?

2.51 sec

Orville: First you have to hit the ball at this angle...

4) Why is your topic relevant?

9.31 sec

Chris Putter (Sportscaster): Thanks to the Industrial Revolution it increased production of goods, gave technological progress, and expanded educational opportunities. We are filming and showing you this footage because of the Industrial Revolution.

5) Anything else you'd like to mention in your video?

2.85 sec

Chris Putter (Sportscaster): Is there anything else you would like to say to our lovely audience?

10.98 sec

Wilbur: I just wanted to say that the industrial revolution wasn't all fun and games like this course, it was also a huge struggle for the working class. You can take that super cute selfie on snapchat because of the hardships and evolution of the industrial revolution. *takes selfie together*
